

# SafeStore Backup Solution

## SAFESTORE BACKUP SOLUTION

This is an online backup service that allows you to backup your valuable computer data over the Internet. SafeStore automates the process of backing up your data offsite. Backups begin automatically and your data is sent to and stored in two redundant storage facilities located hundreds of miles apart. Your data is encrypted, and always remains encrypted using a unique 256-bit encryption key that only we have. Moreover, you can restore your files as often as you need to and at any time day or night, in as easy as a few clicks of your mouse.

## FEATURES OVERVIEW

The SRMS SafeStore Backup Service contains many powerful yet simple to use features. Using SafeStore gives you backup tools previously enjoyed only by Fortune 500 companies, but with an interface designed for anyone to be able to use. Following are just a handful of the ways that you or your business benefits from using our SafeStore Backup Service.

### SECURITY AND ENCRYPTION

With SafeStore, your data is always safe. Your files are encrypted using state-of-the-art, 256-bit AES encryption and stored in redundant, secure data centers located hundreds of miles apart from each other.

### COMPRESSION

SafeStore uses maximum compression technology to ensure that both your bandwidth and storage usage are minimized.

### 24/7 FILE RESTORATION

Backed up data is useless if it can't be restored quickly and easily. With SafeStore, restoring files can be accomplished at anytime with just a few clicks of the mouse.

### LOGS AND REPORTS

How do you know your backups really worked? SafeStore logs and reports let you know what was backed up, when it was backed up, and how much storage space you are using. If you want even more assurances, you have the option to receive automated email notifications on every successful backup.

### SUPPORT FOR MICROSOFT EXCHANGE AND SQL SERVERS

SafeStore gives you the power to backup your critical Microsoft Exchange and Microsoft SQL Databases.
